

Subject : Chemistry.

Topic – Polymer

Class-XII.

1. Write the monomers of neoprene.
2. Write the structure and one use of urea formaldehyde resin.
3. Give an example of elastomers.
4. Is $[\text{CH}_2\text{-CH}(\text{C}_6\text{H}_5)]_n$ a homopolymer or a copolymer, why?
5. Write the name of monomer of PMMA and state one use of it.
6. Write the monomer of buna – N.
7. Mention two important use of the – Bakelite and nylon 66.
