Learn and write the following question answers-

Very short answer questions.

Q1. Name 2 plants that grow in water.

A1. Lotus and waterlily.

Q2. Name 2 desert animals.

A2. Camels and desert rats.

Short answer questions.

Q1. What happens when seeds are put in moist soil?

A1. When seeds are put in moist soil, they start germinating.

Q2. How does a cactus plant survive in a desert?

A2. As very little water is available in deserts, the cactus plant reduces the size of its leaves by converting them into spines.

Q3. Riya keeps a bowl of water on her terrace daily for birds. Do you think she is doing the right thing? Why/why not?

A3. Riya is doing right by keeping water for thirsty birds because often birds don't get water to drink and die due to thirst especially during summers.

Long answer questions.

Q1. What are aquatic plants? Give 2 examples.

A1. The plants which grow in water are called aquatic plants. For example- water lily and water hyacinth.

Q2. What are aquatic animals? Name 2 aquatic animals.

A2. Animals living in water are called aquatic animals. For example- octopus and turtle.
